YANET RODRIGUEZ

Senior mobile developer - Android & iOS

ABOUT ME

Mobile developer with 5+ years of experience in native iOS and Android apps, specialized in Swift, SwiftUI, Combine, and Kotlin with Jetpack Compose and KMM. I lead technical decisions, define architectures, and mentor junior developers.

RELEVANT WORK EXPERIENCE

MOBILE DEVELOPER (IOS/ANDROID) — SENIOR

Personal – Buenos Aires, Argentina (October 2022 - Junio 2026)

Native mobile development for a large-scale entertainment app (live TV, VOD, series) serving millions of users across Argentina. Formally responsible for iOS, with active contributions to Android to ensure cross-platform consistency.

- Built native features on iOS (Swift, UIKit, SwiftUI, Combine) and contributed to the Android codebase (Kotlin), integrating KMP shared modules to ensure business logic parity across platforms.
- Led mobile technical decisions for the Home & Feature Discovery team, defining component structure, data flow, and coding standards for both iOS and Android.
- Drove adoption of async/await and Combine; resolved Swift 6 strict concurrency issues across a media streaming codebase, improving stability and readability.
- Mentored junior iOS developers through code reviews and architectural guidance (VIPER, MVVM).
- Identified and resolved performance and memory management issues, improving overall app stability, in an agile Scrum environment with QA, Design and Backend.

MOBILE DEVELOPER (IOS/ANDROID) — TECH LEAD

Mutual del Tiro - Santa Fe, Argentina (July 2023 - September 2023)

Led end-to-end development of a native app for both iOS (Swift, SwiftUI) and Android (Kotlin, Jetpack Compose), consuming REST APIs via URLSession and Retrofit respectively.

- Owned the full release cycle on both platforms: architecture design, implementation, testing, and store submission (App Store and Google Play).
- Applied MVVM pattern with CoreData (iOS) and Room (Android) for local persistence, ensuring offline capability on both platforms.
- Sole developer responsible for all technical decisions, client communication, and delivery timelines across both codebases.

MOBILE DEVELOPER (IOS/ANDROID) - MID-LEVEL

Nexo Soluciones - Córdoba, Argentina (March 2021 - October 2022)

- Developed native features for both Android (Kotlin, MVVM, Coroutines, Flow, Jetpack components: Navigation, ViewModel, LiveData) and iOS (Swift, SwiftUI/UIKit), maintaining consistency across platforms.
- Managed app lifecycle via Google Play Console and App Store Connect; integrated Firebase (Analytics, Crashlytics, FCM) and Google Cloud services across both platforms.
- Led the Java-to-Kotlin migration on Android and implemented unit tests with JUnit/Mockito (Android) and XCTest (iOS), improving code coverage and reliability.
- Collaborated in Scrum teams using GitHub, Jira, and Confluence, participating in sprint planning and retrospectives.

ANDROID DEVELOPER - MID-LEVEL

VMG–FAR – Santa Fe, Argentina (October 2019 - March 2021)

- Developed mobile applications and internal tools for production line management.
- Administered PostgreSQL, MySQL and SQL Server databases.
- Server support and maintenance.

TECHNICAL SKILLS

- Swift (UIKit, SwiftUI, Combine, Foundation, CoreData).
- Kotlin (Android SDK, Coroutines, Flow, Jetpack Compose, Room).
- Kotlin Multiplatform (KMP).
- SCRUM, Jira, Confluence.
- GitLab, GitHub, Sourcetree.

SOFT SKILLS

Team collaboration
Comfortable working in agile teams and collaborating with designers, developers, and QA.

Continuous learning
Passionate about staying up-to-date with the latest mobile trends and tools.

Problem-solving
Proactive in identifying and resolving bugs and improving app performance.

Communication
Clear communicator, both written and verbal, in team environments and documentation.

EDUCATION

- COMPUTER ENGINEERING

Catholic University of Santiago del Estero

- PRODUCTION OF GOODS AND SERVICES

Professional Technical Education School N°495
